

Brand & typography.

An original identity built around the Phase 2 logo: confident blue, warm orange, and clear architectural lettering.

Precise. Capable. Approachable.

The core palette

Phase 2 Blue

#00437F

Logo, primary actions, brand accents.

Burnt Orange

#B65326

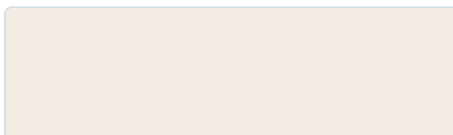

Warm brand accents and graphic details.

Soft Clay

#E9A47D

Gentler warm panels and accents on dark.

Sand

#F4ECE2

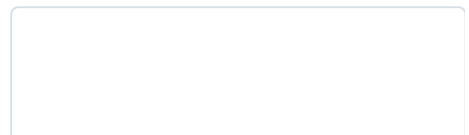

Warm backgrounds for brand materials.

Deep Ink

#112838

Dark backgrounds and strong brand panels.

White

#FFFFFF

Content surfaces and text on solid blue.

Pale Blue #E6F0F7

Selection fill on light surfaces.

Sky #8BC4E8

Links and focus accents on dark surfaces.

70% neutrals and dark structure · 20% blue · 10% orange or clay. A starting balance for brand compositions, excluding photography. Working screens use less decorative color.

Blue leads

Keep actions, navigation, and selections consistently blue. Use Sky where light text is needed on dark navy.

Orange adds warmth

Choose one main warm detail per composition. Pair orange with white text; pair Clay and Sand with dark text.

Color has a purpose

Use labeled green, amber, and red states for success, attention, and errors. Keep decorative accents separate.

The blue is sampled from the existing logo. Supporting colors, typography, and usage rules are a proposed identity. Hex values describe digital sRGB colors; print work needs a proof.

Let the logo lead the type.

Recommended pairing: Saira Semi Condensed for major headings, with Source Sans 3 for ordinary reading. The squared curves echo the original mark.

HEADLINES & PAGE TITLES

Spaces
take shape.

Saira Semi Condensed · 600

Substantial strokes and compact, architectural lettering.
Sample copy only.

BODY TEXT & CONTROLS

Review the job information and save your changes.

Source Sans 3 · 400 / 600

Regular-width text for labels, inputs, navigation, buttons, and small headings.

Il1 · 00 · B8 · Á é ñ

Saira Semi Condensed

PHASE 2

Recommended · squared curves

Barlow Semi Condensed

PHASE 2

Alternative · softer curves

Source Sans 3

PHASE 2

Earlier proposal · understated

Preserve the mark.

Keep its original proportions and blue. Give it at least half its visible width in clear space on each side. Start at 32px visible height for digital use. This PNG belongs on white; use original vector artwork for print. The lettering above is a specimen, not a replacement logo.

Use sentence case for everyday labels, aligned numerals for quantities, and 700 weight only for occasional short brand lettering. Font choices remain recommendations for review.

Keep the work clear.

Apply the same identity to light and dark contexts, with familiar actions and readable controls. These are illustrative examples.

LIGHT CONTEXT

Job #1A · Selected

✓ Active ! Needs review × Error

Consistent actions

Use blue with white text. Hover: #003462. A dark primary button gets a Sky edge.

Visible interaction

Use a 2px focus outline, offset 2px. Keep control borders stronger than decorative dividers.

Simple surfaces

Use solid fills, 4px corners, and thin dividers. Keep the existing labels and reading order.

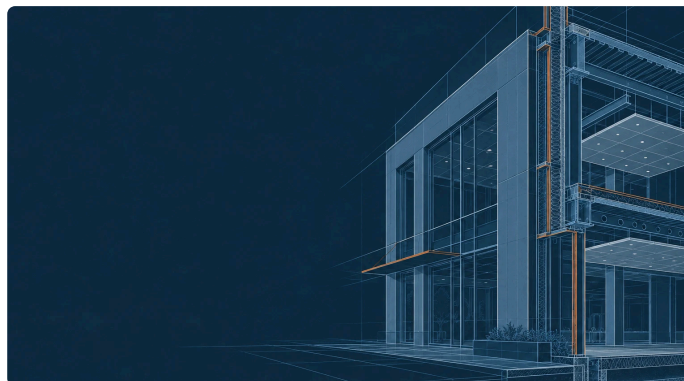

Supporting color values

Role	Light context	Dark context
Canvas / surface	#F3F6F8 / #FFFFFF	#112838 / #1B303F
Main / supporting text	#25343F / #5D6F7D	#EDF4F8 / #B2C3CE
Link / focus	#00437F	#8BC4E8
Selected fill	#E6F0F7	#1B3C53
Control boundary	#7A8B98	#71889A
Decorative divider	#D5DFE6	#354F62
Success	#2C7154	#95D6B6
Attention	#875E24	#EDC47F
Error / destructive	#AC4248	#F0A3A8

Timecard pages share the app navigation and outer background. Preserve the green workspace, its typography, Excel-like layout, controls, behavior, and print geometry.

Give the identity room.

Use photography and a few deliberate brand details to give company materials character. Keep working screens calm and practical.

Show the work.

Favor natural light, materials, craftsmanship, and people at work. Use consistent crops and real project photos when available.

Use a clear structure.

Use architectural artwork at sign-in and in main page headers. Keep the same crop and subtle opacity across pages, with solid working surfaces below.

Both images are generated concepts. The photograph is not a company project; the blueprint illustration is decorative.

Architectural artwork, used with restraint.

Use fine matte-metal grain in the navy sidebar and finer grain in the slate top bar. Use the Jobs blueprint treatment across main page headers. Keep the texture subtle and uniform so navigation stays clear. Typography and warm selection accents carry the identity. Timecard navigation follows this identity; the green workspace retains its established appearance.

Consistent spacing

Build from 4px steps: 8, 12, 16, 24, 32, and 48px. Use larger gaps between sections than between related controls.

Appropriate emphasis

Company pages can use large imagery and headings. Carry the identity into the app with smaller, purposeful details.

Readable color

Use dark body text on Sand and Clay. Keep orange body text on white. Check text against each image crop.

Plain. Direct. Helpful.

“All changes saved.” “Couldn’t save. Try again.”

Use familiar field names and a clear next step. Preserve the workflows people already know.

9.96 : 1

White on Phase 2 Blue

4.94 : 1

White on Burnt Orange

7.27 : 1

Deep Ink on Soft Clay

Measured solid-color pairs. Target 4.5:1 for ordinary text and 3:1 for essential control boundaries. Validate actual screens and interaction states during implementation.
